Highly flexible and fully configurable

JAVLN™ is the creator of innovative business software applications that deliver powerful solutions to a variety of industry sectors.

As a company – and like our namesake – we target our customer’s goals and move with speed and purpose to exceed them. Our solutions are invariably well-executed, powerful tools that are simple to use while delivering incredibly effective solutions that truly make a difference to each of our clients’ businesses.

JAVLN’s leadership team collectively bring together impressive experience in IT and related industries. Our aim is to create differentiated industry software solutions that empower users with more meaningful information about their operations.

JAVLN’s specific software applications are designed to target individual sectors which make it possible for our team to meet even the smallest of our client’s needs. This allows JAVLN to be successful in providing the best possible service and outcomes for our clients and their businesses.

Providing great service across our complete product family is something we strive to achieve. The JAVLN brand represents the overall efficiency and reliability we have developed within our company and product application suite.

JAVLN’s six software solutions are developed, managed and maintained by our fully qualified and capable team, allowing for maximum efficiency when it comes to the installation and maintenance aspects of our software applications.

Imagine a powerful, simple software application that tells you everything you need to know about your business. In real time. In a single pane of glass.

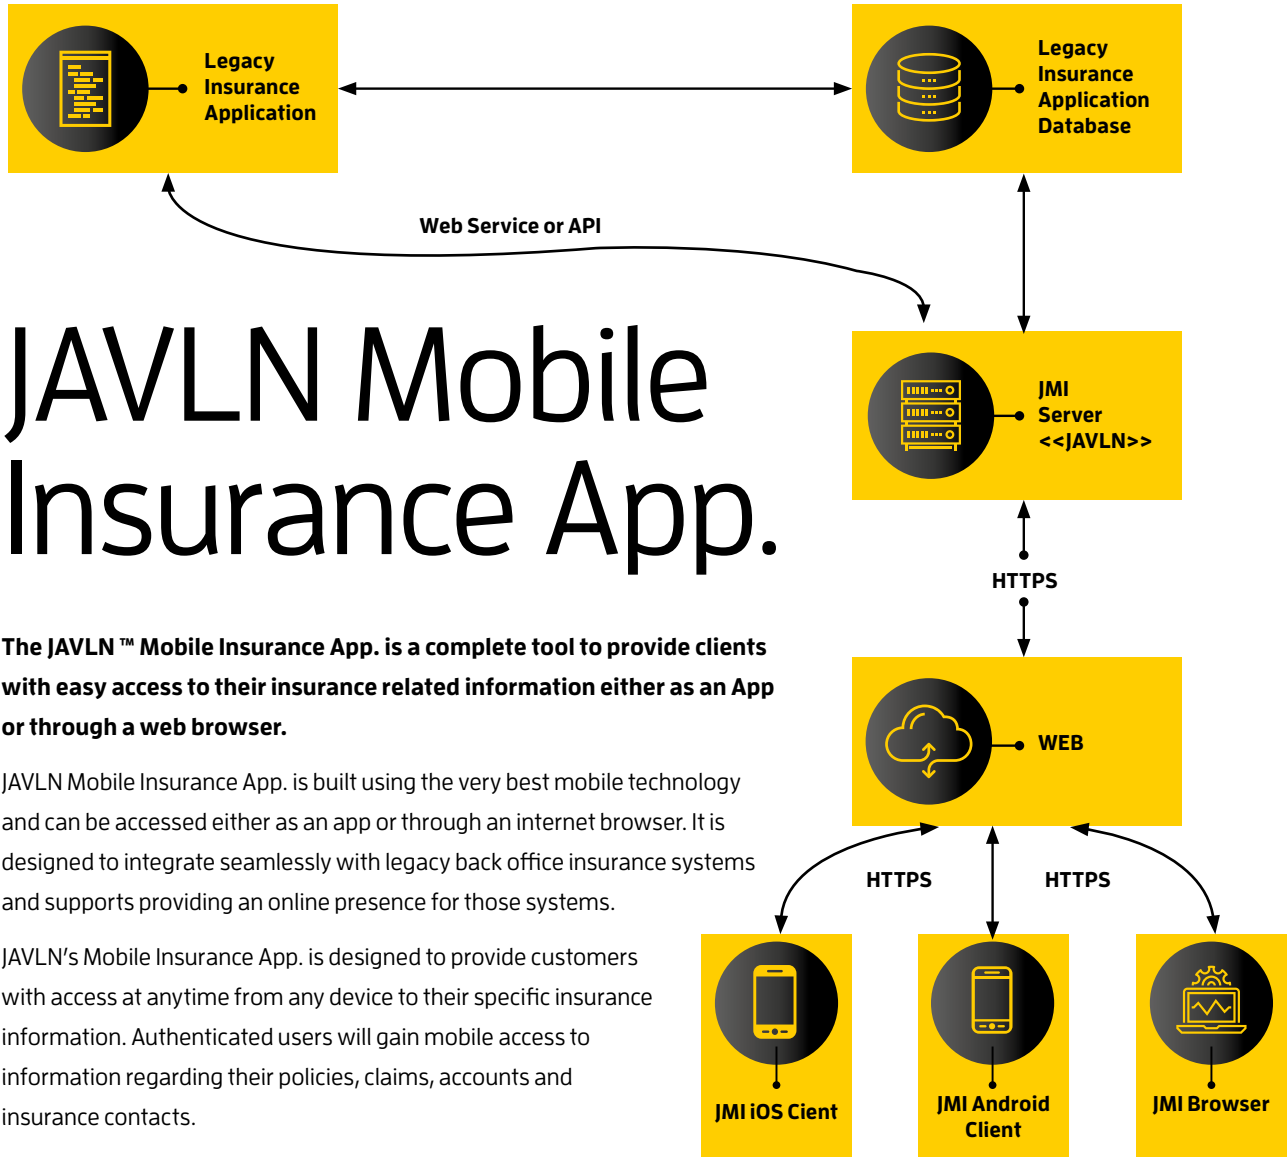

Welcome to JAVLN.

JAVLN offers a range of solutions:

- / Insurance**
- / Financial Services**
- / Field Services**

JAVLN products are designed to...

Provide simple software applications that tell you everything you need to know about your business. In real time. In a single pane of glass.

JAVLN business software applications are based on unique process models developed and tested over many years. Our approach helps our team to create extremely flexible and configurable solutions with graphical, web-based interfaces, that enable customers to access multiple databases or information, simultaneously. The result is highly flexible software applications that make information more readily accessible to your business.

JAVLN has built industry-specific software applications that enable improved efficiency, better customer service that ultimately makes their customers' businesses better.

From the beginning of the process, JAVLN provides an open communication channel to facilitate the best possible outcome for their clients and customers.

JAVLN brings your business data together all in one place so you can drill down in real-time and make better decisions.
